+/- Decorative botanicals

A number of inert, decorative dried botanical ingredients may be included in the product design (lemon, orange, lime, grapefruit peel or slices also mango and pineapple are permitted). Due to the size / nature of these additions there is negligible potential SED - as such they are not included specifically in the formulations or exposure calculations. If used, these ingredients must be listed (with correct INCI name) on the product labelling. Max 10g total in any combination is permitted.

Note that this recipe and method is the property of Cosmetic Safety Solutions Ltd and may not be reproduced in full or in part unless with the express permission of Cosmetic Safety Solutions Ltd. Use of the formulation and method is limited to activities covered by the accompanying CPSR. No liability is accepted for the use or misuse of the formulation.
